Pantomime Performances.

Most pantomime characters were originally borrowed from the Italians. The first real English pantomime was produced at a theater in Lincoln's Inn Fields in 1720. It was called "Harlequin Executed." and its subtitle was "A New Italian Comic Scene Between a Scaramouche, a Harlequin, a Country Farmer, His Wife and Others." The performance was very successful. About the middle of the eighteenth century the character of pantomime performances was completely altered. chiefly because of the genius of the famous Grimaldi, who made the clows the first figure in the pantomime. Gri mald! first appeared at Sadler's Wells theater, where he played the part of a monkey. He was actively engaged on the stage for forty-nine years.

Life Struggle of the Trees.

An interesting light is thrown on the longevity of the trees that grow along the timber line of the Rocky moun tains by Mr. Enos A. Mills in his "Rocky Mountain Wonderland."

A few timber line trees live a thousand years, but half this time is a ripe old age for most of the timber line veterans. The age of these trees cannot be judged by their size or by their general appearance. There may be centuries of difference in the ages of two arm in arm trees of similar size. August when President Wilson sent I examined two trees that were growsota, to the Mexican capital as his in the shelter of a crag. One was in diameter and had 337 annual rings. The other was seven feet high and five Inches in diameter and had lived 492

familiar, but it would take several hours to mention their names.

The absence of saloons and the between the first team girls and a ing in the home of Tonopah lodge, or negroes are allowed to land, which camp for the white man.

That this is going to be a bonanza goes without saving, for the ore belt is 5 by 12 miles in dimension, and is immense. The country is rugged and mountainous, b utthe climate is ideal and at the present writing there are hundreds of tents scattered all over the district from this side of the Colorado river at what is called Old Trails to Gold Roads. Townsites are springing up over night and buildings are being erected like wildfire and the constant sound of the hammer is more musical than the Tonopah band. Carpenters are getting \$6 per day and paper hangers and painters are getting all they can and them some Cafes until you cannot see straight and good meals are furnished at moderate prices. Concrete hotels are in the process of erection in this camp and the many surrounding camps and office buildings galore. Many beautiful homes are already occupied and others going up. Streets are be ing graded and everyone is as busy as can be. All the handshaking is going on at the corner grocery store or on the street corners and the dry's are quenching their thirst at the soda fountain, consequently "old barleycorn" cannot get in his so-called fine work in this district. The promoter's brains (that is some of them) are much clearer and he is wearing a smaller hat.

Old Dad Abbey is here and getting younger every day. When he was dishing out the "eats" in Tonopah he was about 60 summers and now he is only twenty winters, just as jolly and as spry as a kitten. He is to open up a first-class restaurant about three miles from here in what is known as the Hardy district and where one of the big properties of the district is located. This property is called the Times.

The Goldfield boosters are here to stay and if they do not make this camp a world beater then I miss my guess. Kenneth Donnellan was here and will return shortly to open up offices. They are figuring on open ing a stock exchange in the near future. Outside of four or five build ings this place was vold of buildings two months ago and now there is scarcely a vacant lot on Main street. Most of the ground is being leased, but occasionaly a lot is sold. Residental lots are leased at \$1 per month on some of the companies' ground. but the Tom Reed company is charging \$10 per month.

The sanitary conditions are good and this is one of the first things the citizens are going to take an active interest in. There is very little sickness here as no one has time to get sick and taking everything into con An Efficient Heater camp is in a healths condition both as to growth and permanency

The bankers, brokers and "break ers" are all here and if the popula tion increases in the next two months as it has in the past two, people will have to camp on the hillsides.

We had a fine rain yesterday and I am told that there is plenty of moisture here despite the fact that it is a "dry town." I take my hat off to the drys and hope that the next election will make the Needles as dry as a bone for the old booze fighters seem to think that they cannot stop over a few hours without imbibing in a little damnation, but once they get across the river and land here in Oatman they are not apt to return to the Needles as it costs some to go via auto, ferry, etc. If there are any people coming this way to look things over I advise them to take a Pullman with them for there is not a chance to get a wink of sleep for the many

Trusting that all is well in Tonopah and that conditions are improving, I beg to remain.

Yours very truly,
